RESPONSE TO AMENDMENT

The amendment filed on March 28, 2006 has been entered.

Claim 9 has been amended in order to overcome the rejection under 35 U.S.C. 112, 2nd paragraph set forth in the previous Office action.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In line 6 of claim 17 "retention" has been changed to - - retention - -.

REASONS FOR ALLOWANCE

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the prior art of record shows or suggests a roller assembly secured in an opening of a clutch yoke arm including a bearing element and a bearing support having a radially outwardly extended retention flange arranged together in the manner set forth in claim 17, and particularly wherein an end load applied to the retention flange is transmitted through the retention flange and through a corresponding support shaft, bypassing the bearing elements.

Nor does the prior art of record show or suggest a clutch release yoke including a plurality of forks, a plurality of bearing support shafts having a respective retention flange, and a plurality of bearing elements arranged together in the manner set forth in claim 10, and particularly wherein an end load applied to the retention flange is transmitted through the retention flange and through a corresponding support shaft, bypassing the bearing elements.

Nor does the prior art of record show or suggest a clutch release mechanism including a release sleeve, a yoke, bearing support shafts having a retention flanges, and a plurality of bearing elements arranged together in the manner set forth in claim 9, and particularly wherein an end load applied to the retention flange is transmitted through the retention flange and through a corresponding support shaft, bypassing the bearing elements.

Nor does the prior art of record show or suggest a clutch assembly release mechanism including a release yoke, bearing support shafts having a retention flanges, and a plurality of bearing elements arranged together and in combination with the remainder of the structure set forth in claim 1, and particularly wherein an end load applied to the retention flange is transmitted through the retention flange and through a corresponding support shaft, bypassing the bearing elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
